

JINAN HONGYANG CNC MACHINERY CO., LTD

Hongyang 1.5KW (Φ80*220) woodworking advertising water-cooled spindle motor

 <p>弘阳数控 HONGYANG CNC</p>	model:	80-24R-1.5F
	Dimensions:	Φ80*220Φm/m
	Rotating speed:	24000RPM
	power:	1.5KW
	Voltage:	220V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Fan cooling
	Chuck nut:	ER16
	Current:	/

1. Hongyang 1.5kw (Φ80*220) woodworking advertising water-cooled spindle motor should be used with the inverter, and all the specifications of the inverter should match the parameters of the spindle motor. If the settings are incorrect, the spindle motor will be burned.
2. Before the use of HYCNC's [water cooled spindle](#), users should check whether the cooling circulation system of the motor can perform normally or not. It is strictly forbidden to use the spindle without sufficient cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing may change. Hence, it is better for customers to run the spindle at a low speed for the first time.
