Huajiang 1.5KW ER16 Water-cooled Spindle Motor for Woodworking Advertisements

| | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|---------------|
|   | model: | 80 1.5KW ER16 |
| | Dimensions: | Φ80*200Φm/m |
| | Rotating speed: | 24000RPM |
| | power: | 1.5KW |
| | Voltage: | 220V |
| | frequency: | 400HZ |
| | Bearing: | Four bearings |
| | cooling method: | Water cooling |
| | Chuck nut: | ER16 |
| | Current: | / |

1. Huajiang 1.5kw er16 water-cooled spindle motor for woodworking advertisements should be used with the inverter that holds the matching parameters with itself. If this step is wrong, the spindle motor will be burned.
2. Before the use, the users should ensure that the cooling circulation system of this [water cooled spindle motor](#) is working normally, and it is strictly forbidden to use spindle motors without sufficient cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change; hence, the customers should run the spindle at a low speed before use.
