

JINAN HONGYANG CNC MACHINERY CO., LTD

Huajiang 3.0KW Woodworking Advertising Water-Cooled Spindle Motor

 	model:	100 3KW ER20
	Dimensions:	Φ100*220Φm/m
	Rotating speed:	24000RPM
	power:	3.0KW
	Voltage:	220V/380V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER20
	Current:	/

1. Huajiang 3.0kw woodworking advertising water-cooled spindle motor should be used with the inverter. The specifications and parameters of the inverter should match the rated parameters of the spindle motor. If these settings are incorrect, the spindle motor can get seriously burned.
2. Before every use, the spindle users must make sure that the cooling circulation system of the [CNC spindle motor](#) is still working normally, and it is strictly prohibited to use the CNC router spindle motor without enough cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Thus, it is suggested that the customers should run the water-cooled spindle motor at a low speed before it is officially put into use.
