Huajiang 5.5KW Water-cooled Woodworking Advertising Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	model:	125 5.5KW ER25
	Dimensions:	Φ125*290Φm/m
	Rotating speed:	24000RPM
	power:	5.5KW
	Voltage:	220v/380V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER25
	Current:	/

1. Huajiang 5.5kw water-cooled woodworking advertising spindle motor should be used with the inverter that shares the similar specifications with the spindle motor. If the settings are incorrect, the spindle motor may get seriously burned.
2. Before using, the water-cooled spindle motor must ensure its cooling circulation system can function normally, and it is prohibited to use the spindle motor without enough clean cooling water.
3. During the storage and transportation of this spindle motor, the state of the high-speed grease inside the bearing may change; thus, it is better for users to run this [5.5 kw water cooled spindle](#) at a low speed before use.
