

JINAN HONGYANG CNC MACHINERY CO., LTD

Huajiang 800W Woodworking Advertising Water-cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	Spindle model:	65 0.8KW ER11 water cooling
	Dimensions:	Φ65*183Φm/m
	Spindle speed:	24000RPM
	Spindle power:	0.8KW
	Spindle voltage:	220V
	Spindle frequency:	400HZ
	Spindle bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER11A
	Spindle current:	/

1. Huajiang 800W woodworking advertising water-cooled spindle motor should be used with the corresponding inverter. The specifications and parameters of the inverter should match the parameters of the spindle motor. If the settings are incorrect, the spindle motor will be burned.
2. Just like other [CNC spindle motor](#) in this series, before using, the water-cooled spindle motor must ensure that the cooling circulation system can function normally. It is prohibited to use this spindle without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing might change; hence, before the first use, the customer should run it at a low speed.
4. The advantages of Huajiang 800W woodworking advertising water-cooled spindle motor: it has higher precision, higher rigidity, higher efficiency and more affordable price than ordinary woodworking spindles. Its shell is made of waterproof and durable steel. Furthermore, the use of ceramic ball bearings also greatly increases the service life of the spindle motor. Using high-quality steel, the rotor has a stronger cutting force. The coil also uses an extended coil to ensure more power.
