

JINAN HONGYANG CNC MACHINERY CO., LTD

JST 1.5KW (Φ 80*225) Woodworking Advertising Water-cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	Spindle model:	JGD-80A-1.5KW
	Dimensions:	Φ80*225Φm/m
	Spindle speed:	24000RPM
	Spindle power:	1.5KW
	Spindle voltage:	220V/380V
	Spindle frequency:	400HZ
	Spindle bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER16
	Spindle current:	/

1. JST 1.5kw (Φ 80*225) woodworking advertising water-cooled spindle motor should be used with the corresponding inverter. The parameters of the inverter should match the parameters of the spindle motor. If these settings are incorrect, the spindle motor may get burned.
2. Before use, the [water cooled spindle motor](#) must ensure that its cooling circulation system can work normally, and it is prohibited to use the spindle without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will normally change. Thus, the customers should run the spindle at a low speed before the first use.
