## JST 3.0KW $\Phi$ 105 Woodworking Advertising Water-Cooled Spindle Motor

 <p>弘阳数控 HONGYANG CNC</p>	Spindle model:	JGD-105-3.0KW
	Dimensions:	$\Phi$ 105
	Spindle speed:	24000RPM
	Spindle power:	3.0KW
	Spindle voltage:	220V/380V
	Spindle frequency:	400HZ
	Spindle bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER20
	Spindle current:	/

1. JST 3.0kw woodworking advertising water-cooled spindle motor should be used with the inverter that holds the matched parameters with itself. If the settings are incorrect, the spindle motor can get seriously burned.
2. Before every use, the [water cooled spindle motor](#) must ensure its cooling circulation system is working normally, and it is strictly prohibited to use the spindle motor without sufficient cooling water.
3. Moreover, during the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Hence, the water-cooled spindle users should always run their motors at a low speed before their first use.
