

JINAN HONGYANG CNC MACHINERY CO., LTD

JST 5.5KW Water-cooled Woodworking Advertising Spindle Motor

	model:	JGD-125C-5.5KW
	Dimensions:	Φ125
	Rotating speed:	24000RPM
	power:	5.5KW
	Voltage:	220v/380V
	frequency:	400HZ
	Bearing:	Four bearings
	cooling method:	Water cooling
	Chuck nut:	ER25
	Current:	/

1. JST 5.5kw water-cooled woodworking advertising spindle motor should be used with the inverter. The specifications of the inverter should also match the related parameters of the spindle motor. If these settings are incorrect, the spindle motor will easily get burned.
2. Before using, it is significant to make sure that the cooling circulation system of the [water cooled spindle motor](#) is working normally, and it is strictly prohibited to use the CNC spindle motor without sufficient cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change; thus, the customers should run this spindle motor at a low speed before use.
