## Shun Tong 4.5KW Woodworking Advertising Water-cooled Motor

	<b>model:</b>	GDZ-125-4.5
	<b>Dimensions:</b>	Φ125*298Φm/m
	<b>Rotating speed:</b>	24000RPM
	<b>power:</b>	4.5KW
	<b>Voltage:</b>	220v/380V
	<b>frequency:</b>	400HZ
	<b>Bearing:</b>	4 bearings
	<b>cooling method:</b>	Water cooling
	<b>Chuck nut:</b>	ER25
	<b>Current:</b>	/

1. This Shun Tong 4.5kw woodworking advertising water-cooled motor should be used with the inverter. The specifications and parameters of the inverter should match the parameters of the spindle motor, and these settings are incorrect, the spindle motor will get burned.
2. Before using, the water-cooled spindle motor must ensure its cooling circulation system is working normally, and it is strictly forbidden to use the water-cooled spindle without cooling water.
3. During the storage and transportation of the spindle motor, the state of the high-speed grease inside the bearing will change. Thus, as a mature [CNC parts manufacturer](#) in China, HYCNC reminds you to run the motor spindle at a low speed before use.
